

Name: _____ Remix a Script

1. Look at this script below used for the *Addition Dance*.

• If the answer is 15, **then** what happens? _____

• If the answer does not equal 15 and it is something **else**, what happens?

2. Think of a new addition problem to use for a remix. What problem will you use?

3. Use a red pen, marker or crayon to circle all the parts of this script that you will change to create your remix.

4. Next to each of the red circles you drew, write what you would place in the circle instead.
