

Name: _____ The Script

1. Use this script to help you complete the first part of your problem.
2. Add a broadcast to your script to make it special. Will Avery move? Will the butterfly move? You decide.

```
define Avery's cookies how many?  
say Hello, I am Avery, for 2 secs  
say join I have join how many? cookies, for 3 secs  
say Mary has 2.5 times as many cookies as I have, for 5 secs  
say How many cookies does Mary have? for 3 secs  
say join Mary has how many? * 2 + how many? * 0.5 for 3 secs  
say join I know this because join how many? x 2 = for 3 secs  
say how many? * 2 for 3 secs  
say And I know that if you multiply by .5 it is the same as finding 1/2 of a number. And for 10 secs  
say join how many? x .5 = for 3 secs  
say how many? * 0.5 for 3 secs  
say So I just add for 3 secs  
say join how many? * 2 join + how many? * 0.5 for 3 secs  
say Which equals for 3 secs  
say join how many? * 2 + how many? * 0.5 cookies for Mary! for 5 secs  
think I am good at math.
```
